SEMINAR

REBECCA RENIRIE

Subject Librarian for  
Biology, Engineering and Mathematics  
Central Michigan University

CMU LIBRARY SERVICES AND RESOURCES  
FOR GRADUATE STUDENTS IN  
DEPARTMENT OF MATHEMATICS

Tuesday, February 14, 4:00 pm - 5:00 pm  
Pearce Hall, Room 227

In this presentation CMU mathematics librarian Rebecca Renirie will review library services and resources available to assist graduate students in their research. Services available for graduate students include longer book checkout as well as individual research rooms that may be reserved for up to one year. The resources of the CMU Libraries are numerous, and in this presentation students will see a selection of those resources most helpful to graduate-level research in mathematics, math education, and statistics. Two featured journal article databases will be demonstrated: MathSciNet (from the American Mathematical Society) and ERIC (ProQuest). Students will learn strategies for searching these resources for scholarly articles and how to get those articles in full text as PDFs, including the use of Documents on Demand for those articles that are unavailable online. In addition, students will see a demonstration of the database Dissertations and Theses and learn to find full text PDF copies of masters theses and doctoral dissertations from institutions world-wide.
