Introduction

Anthony D. Feig and Alison Stokes

THEORETICAL FOUNDATIONS

1. Methodology and location in the context of qualitative data and theoretical frameworks in geoscience education research
   Anthony D. Feig

2. Theoretical perspectives on constructing experience through alternative field-based learning environments for students with sensory impairments
   Christopher L. Atchison and Anthony D. Feig

3. A phenomenographic perspective on understanding students’ conceptions of geoscience in educational contexts
   John L. Robinson and A. D. Feig

4. The qualitative underpinnings of quantitative concept inventory questions
   Julie C. Libarkin and Emily M. Geraghty Ward

METHODOLOGY AND MODELS

5. Ethnographic methods in analysis of place-based geoscience curriculum and pedagogy
   Deborah Williams and Steven Semken

6. Developing a process model for visual penetrative ability
   Matthew Alles and Eric M. Riggs

CONTENTS

7. Designing a mixed-methods research instrument and scoring rubric to investigate individuals’ conceptions of plate tectonics
   Scott K. Clark and Julie C. Libarkin

8. Qualitative methods applied in the development of an introductory oceanography concept inventory survey
   Leilani Arthurs and Thomas Marchitto

COMPLETE STUDIES

9. Geobiological opportunities to learn at U.S. fossil parks
   Renee M. Clary and James H. Wandersee

10. What college-level students think: Student alternative conceptions and their cognitive models of geoscience concepts
    Leilani Arthurs

11. Understanding, analysis, and use of climate forecast data by environmental science students
    Toru Ishikawa, Anthony G. Barnston, Kim A. Kastens, and Patrick Louchouarn

12. Counting tectonic plates: A mixed-methods study of college students’ conceptions of plates and plate boundaries
    Karen M. Kortz, Scott K. Clark, Kyle Gray, Jessica J. Smay, Brendalee Viveiros, and David Steer

13. Student interpretation of a global elevation map: What it is, how it was made, and what it is useful for
    Sandra Swenson and Kim Kastens
